PROFILE

Aspiring postgraduate student in computing and cybersecurity with a multidisciplinary background in marketing, web and application development, and networking. Holder of a BTS in Web and Application Development with professional experience in software development and Cisco CCNA training. Seeking advanced academic study to specialize in network security, secure systems, and cybersecurity within a rigorous academic environment.

WORK EXPERIENCE

• Web & Mobile Developer – Talabe Store (Not Easy) (17/06/2025 – Present)

Developed and maintained web and mobile applications (React, Next.js, Node.js, React Native).

Managed projects from idea to deployment, including system design, databases (MongoDB, MySQL), and cloud deployment (AWS, Heroku, Netlify).

Ensured performance, reliability, and secure coding practices.

Collaborated with teams to implement new features and troubleshoot issues.

• Intern – Talabe Store (Not Easy) (08/01/2025 – 07/05/2025)

Gained hands-on experience in web development, coding, and project workflows.

• Full-Stack Web Development Training – Code213 School of Coding (10/07/2023 – 21/10/2023)

Practical training in modern front-end and back-end development, databases, and REST API development.

• Web & Application Development Training – SEEAL (08/09/2024 – 08/12/2024)

Focused on application development, system design, and database integration.

• Marketing Training – Algeria Telecom (20/03/2024– 10/06/2024)

Applied marketing theory in real-world business settings, including market research, user analysis, and strategy development.

EDUCATION

• Higher Diploma in Web and Application Development – Institut National Spécialisé en Formation Professionnelle – Rahmania (Graduated 2025)

Focused on full-stack web & app development, application design, databases, and system architecture.

• Bachelor's in Marketing – University of Algiers 3 (Graduated 2024)

Focused on market analysis, business strategy, and consumer behavior.
